OPTICS AND LASER TECHNOLOGY

INDEX TO VOLUME 10

Research and development

Airborne laser to chart oceans, 163
Computer storage method based on laser photochemistry, 276
Fibre-optic sensing device for sonar system, 222
Glass fusing in space, 222
High-speed tuning of fir laser demonstrated, 275
Laser-equipped rifle training, 275
Laser-fusion/industrial staff member programme, 276
Laser gyroscope goes on test, 51
Laser microscope, 51
Laser mini-transceiver, 276
Laser rocket propulsion feasable, 3
Laser speckle photography of fluid flow, 3
Mobile light 'bubbles' observed, 220
Optical disc system for recording digital data, 51
Remote spectrochemical analysis, 219
Ring laser gyro for inertial navigation systems, 276
Tubeless colour tv cameras, 51
Waveguide exceeds 3 GHz bandwidth, 219
World's largest laser reaches full power, 163

Industry

Bright future for led's, 278
Courses in optical technology, 4
Crystal window production speeded by bandsaw, 107
Electro-optics assesses strain in air-frames, 4
Fibre-optic data link for optical communications, 165
Gaskets and seals by laser, 54
Holography in engineering metrology, 108
Infra-red detectors for intruder alarms, 54
Laser-printing plate systems report – a success, 6
Laser-Scan fellowship for Cavendish Laboratory, 279
Laser seals polythene, 54
Lasers for high-strength steel welding, 54
Lasers in reprographics and communications, 279
Laser target markers for the British army, 54
Laser welder for fan jet blades, 165
Military laser systems, 164
New optical cable produced, 107
On-line volume measurement of bulk materials, 107
Optical cable used in Italian telephone network, 108
Optical shaft encoders, 225
Optical test gauge for lenses, 4
Optical waveguides in 9 km link, 163
Pilkington Hytran fibres, 52
Pyroelectric infra-red detector production expanded, 225
Smoke detector, 163
Surface stress meter for chemically strengthened glass, 164
USA distrubotor announced, 6
Walmore expands into lasers, 164

Products

All replicated monochromator, 284
CO_2 laser for materials processing, 11
CO_2 laser spectrum analyser, 10
Commercial picosecond dye lasers, 283
Components for single fibre-optic cables, 170
Cw lasing range expanded with dye laser system, 168
Double monochromator in a small package, 168
Electro-optics modulators, 61
Emitters and detectors for fibre optics, 112
Fast pyroelectric infra-red detector for CO_2 laser pulses, 228
F-centre laser, 108
Fibre-optic-pulsed light source, 230
Fibre-optic telephone system for interference – free communications, 11
Fused silica lenses, 10
Gas lasers for the infra-red and far infra-red, 166
Glass aids infra-red transmission, 59
Green and yellow leds with high brightness, 169
High power argon and krypton ion lasers, 110
High power argon and krypton ion lasers, 166
High efficiency led displays, 11
High efficiency red and yellow displays, 57
High resolution optical mounts featured in micropositioner range, 234
High-speed scanning and colour image generation system. 172
Image intensifier for high speed photography, 169
Infra-red detectors use pyroelectric effect, 231
Injection lasers for fibre-optic communications, 170
Krypton ion laser, 55
Laser silencing device, 55
Magnesium fluoride for coatings, 112
Micrometer settings locked, 173
Micro optics, 61
Microscopic optics, 172
Molybdenum mirrosr, 284
Monochromators and accessories, 230
Motorized translation units, 283
Nd:YAG-pumped dye laser produces peak power of 0.5 MW, 280
Nitrogen pumped dye lasers, 6
OEM hybrid photodiode, 169
Optical attenuation meter for optical fibres, 170

Position sensing photodiodes, 109
Power meter for fibre-optics, 110
Pryoelectric ceramic infra-red detector arrays, 11
Pyroelectric infra-red detector, 10
Quarter-metre monochromator, 234
Red leds offer choice of configurations, 170
Reflective beam expander, 110
Ring dye laser produces ten-fold increase in output power, 228
Rugged fibre cables, 112
Self-scanning photodiode array for spectroscopy, 228

Products

SHG system for pulsed dye lasers, 112
Single channel fibre-optic transmission systems for one-way data flow, 59
Spatially filtered off-axis reflective beam expanders, 55
Stable optical mounts, 231
Super high brightness 4 digit display, 57
Tellurium dioxide for laser deflections, 8
Translation stages, 231
Translator controls elevation, 283
Translator reads to 2 μm, 230
Tunable TEA CO_2 laser, 61
Tunable ultra-violet, 61
Ultra-high uniformity beam expander aids chemical and CO_2 laser users, 165
Ultra-violet fibre-optic source, 168
Ultra-violet standards of spectral irradiance, 284
Ultra-violet visible spectroradiometer, 282
Vidicon tubes, 57
Waveguide line extended, 59

Conferences

Application of tunable lasers (9 September 1977) 45
Association for high speed photography autumn conference (11 October 1977) 43
Association for high speed photography spring conference (21–22 March 1978) 267
Electro-Optics Laser International '78 UK . . . ECOSA 1 (3–6 April 1978) 201
Laser technology (18 May 1978) 265
Optical techniques in structural engineering (28 November 1977) 98
Optical telescopes of the future (12–15 December 1977) 97
Optics at Imperial College (15 June 1978) 265
79th annual conference of the Society for Applied Optics (DGaO) (16–20 May 1978) 266

Titles of articles, research notes, and letters to the editor

Aberrated diffraction patterns of off-axis Gaussian beams *A. Yoshida, T. Asakura* 141
Automated spectral loss measurements of optical fibres *L. Wilson, M.J. Buckler* 197
Combined laser doppler and time of flight anemometer *R.G.W. Brown, E.R. Pike* 317
Construction of an interferometric gauge system for thickness measurement in white light *J.P. Goedgebuer, A. Lacourt, M. Guignard* 193
CW mode-locked dye lasers for ultra fast spectroscopic studies *G.R. Fleming, G.S. Beddard* 257
Experimental and theoretical studies related to a dye laser differential lidar system for the determination of atmospheric SO_2 and NO_2 concentrations *P.T. Woods, B.W. Jolliffe* 25
Generalized ray tracing and the caustic surface *O.N. Stavroudis, R.C. Fronczek* 185
High power lasers for processing of materials – a comparison of available systems *I.J. Spalding* 29
Holographic measurement of high viscosities *G. Carini Jr, M. Cutroni, F. Wanderlingh* 241
Laser-controlled switching of dc or rf signals up to the GHz range: A new field of laser application *W. Platte* 40
Laser satellite ranging as a hazard to overflying aircraft *G.J. Pert* 77
Laser spectroscopy: 4. Nonlinear high resolution spectroscopy *V.S. Letokhov* 15
Laser spectroscopy: 5. Raman spectroscopy *V.S. Letokhov* 129
Laser spectroscopy: 6. Selective detection of ultra-low concentrations of atoms and molecules *V.S. Letokhov* 175
Laser spectroscopy: 7. Multiphoton and multistep methods *V.S. Letokhov* 247
Laster spectroscopy: 8. Picosecond processes *V.S. Letokhov* 301
Limits to incoherent optical power launching into lightguides *F. Bodem* 89
Measurement of flow-birefringence using a circularly polarized laser beam *K. Matsuura, S. Hattori, I. Noda, M. Nagasawa* 237
Measurement of the thickness of thin films deposited on smooth non-planar substrates *S.E. Gustafsson, Ijaz-ur-Rehman, M. Saleem Iqbal* 37
Measurement of the tilt of defective surfaces in a multi-element lens *G. Jaunet, J.P. Marioge* 148
Mechanical vibration measurements using a fibre-optic laser-Doppler probe *R.A. Cookson, P. Bandyopadhyay* 33
New generation of ultra-violet/visible gas lasers *J.M. Green* 289
On the nature of light *R.B. Dennis* 145
Optical surface figured by laser-controlled chemical reactions *K. Daree, W. Kaiser* 65
Performance of photon drag and photon drag-optical rectification detectors in the 2 to 33 μm range *A.A. Serafetinides, A.K. Kar, M.F. Kimmitt* 243
Plastics optics for opto-electronics *I.K. Pasco, J.H. Everset* 71
Pulsed lasers in electronic speckle pattern interferometry *T.J. Cookson, J.N. Butters, H.C. Pollard* 119
Resonant interaction of a mode-locked pulse train with a crystal lattice at helium temperatures *A.H. Piekara, B. Ratajska* 200
Simple carbon dioxide laser amplifier suitable for optically pumped infra-red laser applications *B.W. Jolliffe, P.T. Woods, D.J. Ravenhill* 86

Simple computer-generated holograms displayed by an x-y plotter *K. Nagashima, T. Asakura* 310
Study of the optics and motion of oil droplets *L.H. Tanner* 125
Surface photochemistry and photodesorption *T.E. Gangwer* 81
Transmissibe similarity and scale models in a light absorbing, randomly scattering medium *C. Beck* 313
Ultra-violet ion lasers *J.R. McNeil, R.D. Reid, D.C. Gerstenberger, G.J. Collins* 138

OPTICS LASERS

We need people with a very good background and understanding of modern optics and/or lasers who, preferably, have practical experience of working in this specialized field. The right people will be wholly responsible for the promotion of a range of high technology products manufactured by some of the World's leading companies in this exciting field.

LASER LINES LTD is one of the leading distributors of high technology equipment in the optics and laser market and is also one of the most rapidly expanding companies in this field. LASER LINES represents companies in the USA, Europe and the UK whose products include high energy laser optics, laser components, UV lasers, tunable laser, CNC control systems, scanning interferometers, tunable filters and many other sophisticated products.

The successful candidate will join the marketing team and will be offered an attractive salary with car, pension and other benefits including a generous moving allowance. If you would like to join our successful Company and contribute to its expansion, please write with full details of experience to TED PAINE.

LASER LINES LIMITED

19 West Bar,
Banbury, Oxon,

LL LTD G

LASER TESTING TECHNOLOGIST SAUDI ARABIA

An urgent vacancy exists with an Arabian Rubber Remould manufacturer for an experienced Laser Technologist, to be trained in NDT for remould tyres for the aircraft and construction industries.

The successful applicant will be sent to Detroit, USA, for initial training prior to taking up this appointment in Riyadh, Saudi Arabia.

A substantial tax free salary, tax free profit share, free air conditioned apartment, free car, air fares, insurance etc., are offered to either bachelors or married men.

In the first instance please write or telephone to the company's U.K. advisers:

A. Fairfield-Geen,
Malla Management Consultants,
1 Devonshire St., London. W1N 1FX
Tel: 01-636 5991
